See Appendix for permissible uses,

Introduction

- + This is one of a series of reports looking at media technology penetration and usage in select markets across Canada.
- + While this report offers insight into the penetration and usage of media technologies in individual markets based on combined fall and spring data available from the Media Technology Monitor (MTM)*, it should not be considered a substitute for Numeris market data.
- + The Media Technology Monitor (MTM) incorporates a mixed-methodology approach which included a phone survey and a follow-up survey online. The data from this report comes primarily from the phone portion of the survey unless otherwise noted.**
- + Select market data is based on sub-samples of the MTM survey, and therefore, the margin of error increases due to smaller sample size
 - The margin of error for the British Columbia market is +/-2.9%*

* See Appendix 1 for further information on our survey methodology, permissible uses and margin of error by selected markets.

**Data in this report coming from the online portion of the survey will be identified with this symbol +.
